UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT SEATTLE

JOHN DOE,

Plaintiff,

No. C01-453Z

v.

ORDER

2THEMART.COM INC.,

Defendant.

This matter comes before the Court on the motion of J. Doe (Doe) to proceed under a pseudonym and to quash a subpoena issued by 2TheMart.com (TMRT) to a local internet service provider, Silicon Investor/InfoSpace, Inc. (InfoSpace). The motion raises important First Amendment issues regarding Doe's right to speak anonymously on the Internet and to proceed in this Court using a pseudonym in order to protect that right. The Court heard oral argument on the motion and issued an oral ruling on April 19, 2001. Due to the importance of the constitutional issues raised by this motion, the Court now issues this written order.

**FACTUAL BACKGROUND**

There is a federal court lawsuit pending in the Central District of California in which the shareholders of TMRT have brought a shareholder derivative class action against the company and its officers and directors alleging fraud on the market. In that litigation, the defendants have asserted as an affirmative defense that no act or omission by the defendants

1 caused the plaintiffs' injury. By subpoena, TMRT seeks to obtain the identity of twenty-  
 2 three speakers who have participated anonymously on Internet message boards operated by  
 3 InfoSpace. That subpoena is the subject of the present motion to quash.

4 InfoSpace is a Seattle based Internet company that operates a website called "Silicon  
 5 Investor." The Silicon Investor site contains a series of electronic bulletin boards, and some  
 6 of these bulletin boards are devoted to specific publically traded companies. InfoSpace users  
 7 can freely post and exchange messages on these boards. Many do so using Internet  
 8 pseudonyms, the often fanciful names that people choose for themselves when interacting on  
 9 the Internet. By using a pseudonym, a person who posts or responds to a message on an  
 10 Internet bulletin board maintains anonymity.

11 One of the Internet bulletin boards on the Silicon Investor website is specifically  
 12 devoted to TMRT. According to the brief filed on behalf of J. Doe, "[t]o date, almost 1500  
 13 messages have been posted on the TMRT board, covering an enormous variety of topics and  
 14 posters. Investors and members of the public discuss the latest news about the company,  
 15 what new businesses it may develop, the strengths and weaknesses of the company's  
 16 operations, and what its managers and its employees might do better." See Doe's  
 17 memorandum, docket no. 2 at 4. Past messages posted on the site are archived, so any new  
 18 user can read and print copies of prior postings.

19 Some of the messages posted on the TMRT site have been less than flattering to the  
 20 company. In fact, some have been downright nasty. For example, a user calling himself  
 21 "Truthseeker" posted a message stating "TMRT is a Ponzi scam that Charles Ponzi would be  
 22 proud of. . . . The company's CEO, Magliarditi, has defrauded employees in the past. The  
 23 company's other large shareholder, Rebeil, defrauded customers in the past." Another poster  
 24 named "Cuemaster" indicated that "they were dumped by their accountants ... these guys are  
 25 friggin liars ... why haven't they told the public this yet??? Liars and criminals!!!!" Another  
 26 user, not identified in the exhibits, wrote "Lying, cheating, thieving, stealing, lowlife

1 criminals!!!!” Other postings advised TMRT investors to sell their stock. “Look out  
 2 below!!!! This stock has had it ... get short or sell your position now while you still can.”  
 3 “They [TMRT] are not building anything, except extensions on their homes...bail out now.”

4 TMRT, the defendant in the California lawsuit, issued the present subpoena to  
 5 InfoSpace pursuant to Fed.R.Civ.P. 45(a)(2). The subpoena seeks, among other things, “[a]ll  
 6 identifying information and documents, including, but not limited to, computerized or  
 7 computer stored records and logs, electronic mail (E-mail), and postings on your online  
 8 message boards,” concerning a list of twenty-three InfoSpace users, including Truthseeker,  
 9 Cuemaster, and the current J. Doe, who used the pseudonym NoGuano. These users have  
 10 posted messages on the TMRT bulletin board or have communicated via the Internet with  
 11 users who have posted such messages. The subpoena would require InfoSpace to disclose  
 12 the subscriber information for these twenty-three users, thereby stripping them of their  
 13 Internet anonymity.<sup>1</sup>

14 InfoSpace notified these users by e-mail that it had received the subpoena, and gave  
 15 them time to file a motion to quash. One such user who used the Internet pseudonym  
 16 NoGuano now seeks to quash the subpoena.<sup>2</sup>

17 NoGuano alleges that enforcement of the subpoena would violate his or her First  
 18 Amendment right to speak anonymously. In response to the motion this Court issued a  
 19 Minute Order directing the interested parties TMRT, InfoSpace, and NoGuano to file

---

21       <sup>1</sup> At oral argument, this Court expressed its concern that this subpoena was overly broad.  
 22 Counsel for TMRT clarified that the only information the defendant was seeking was the identity  
 23 of the twenty-three listed Internet users. Accordingly, the Court treats this subpoena as if it had  
 24 only requested the identity of the listed individuals.

25       <sup>2</sup> NoGuano has moved anonymously to quash the subpoena. At oral argument, counsel  
 26 for all parties agreed that NoGuano was entitled to appear before this Court anonymously on the  
 motion to quash. When an individual wishes to protect their First Amendment right to speak  
 anonymously, he or she must be entitled to vindicate that right without disclosing their identity.  
 Accordingly, this Court grants NoGuano’s request to proceed under a pseudonym for the  
 purposes of this motion. However, this Court does not hold that a person would be allowed to  
 proceed anonymously in all cases or under any circumstances. The Court need not reach this  
 issue in light of the parties’ agreement to allow Doe to proceed anonymously before this Court.

1 additional briefing. All interested parties filed briefing as directed and participated in oral  
 2 argument.<sup>3</sup>

3 **DISCUSSION**

4 The Internet represents a revolutionary advance in communication technology. It has  
 5 been suggested that the Internet may be the “greatest innovation in speech since the invention  
 6 of the printing press[.]” See Raymond Shih Ray Ku, Open Internet Access and Freedom of  
7 Speech: A First Amendment Catch-22, 75 Tul. L. Rev. 87, 88 (2000). It allows people from  
 8 all over the world to exchange ideas and information freely and in “real-time.” Through the  
 9 use of the Internet, “any person with a phone line can become a town crier with a voice that  
 10 resonates farther than it could from any soapbox.” Reno v. ACLU, 521 U.S. 844, 870  
 11 (1997).

12 The rapid growth of Internet communication and Internet commerce has raised novel  
 13 and complex legal issues and has challenged existing legal doctrine in many areas. This  
 14 motion raises important and challenging questions of: (1) what is the scope of an individual’s  
 15 First Amendment right to speak anonymously on the Internet, and (2) what showing must be  
 16 made by a private party seeking to discover the identity of anonymous Internet users through  
 17 the enforcement of a civil subpoena?<sup>4</sup>

18 A. The anonymity of Internet speech is protected by the First Amendment.

19 The right to the freedom of speech is enshrined in the First Amendment to the United  
 20 States Constitution, which provides that “Congress shall make no law . . . abridging the  
 21 freedom of speech, or of the press[.]” U.S. Const. amend. I. This limitation on governmental  
 22 interference with free speech applies directly to the federal government, and has been

---

23  
 24 <sup>3</sup> Counsel for plaintiffs in the underlying securities litigation appeared at oral argument  
 but did not wish to be heard on the motion.

25  
 26 <sup>4</sup> Neither the parties nor this Court has found any federal court authority evaluating the  
 First Amendment rights of anonymous Internet users in the context of a third-party civil  
 subpoena seeking the identity of those users. The parties have directed the Court to the few state  
 court decisions on this issue.

1 imposed on the states via the Fourteenth Amendment. See, e.g., First Nat'l Bank v. Bellotti,  
 2 435 U.S. 765, 779-80 (1978).

3 A court order, even when issued at the request of a private party in a civil lawsuit,  
 4 constitutes state action and as such is subject to constitutional limitations. See, e.g., New  
 5 York Times Co. v. Sullivan, 376 U.S. 254, 265 (1964); Shelley v. Kraemer, 334 U.S. 1  
 6 (1948). For this reason, numerous cases have discussed the limitations on the subpoena  
 7 power when that power is invoked in such a manner that it impacts First Amendment rights.  
 8 See, e.g., NAACP v. Alabama ex rel. Patterson, 357 U.S. 449, 461 (1958)(discussing the  
 9 First Amendment implications of a civil subpoena to disclose the membership list for the  
 10 NAACP); Los Angeles Memorial Coliseum Comm'n v. Nat'l Football League, 89 F.R.D.  
 11 489 (C.D. Cal. 1981)(discussing the First Amendment implications of a civil subpoena to  
 12 disclose the names of confidential journalistic sources); Snedigar v. Hoddersen, 114 Wn.2d  
 13 153 (1990)(discussing the First Amendment implications of a civil subpoena to disclose the  
 14 meeting minutes of a political association).

15 First Amendment protections extend to speech via the Internet. "Through the use of  
 16 web pages, mail exploders and newsgroups, [any person] can become a pamphleteer." Reno,  
 17 521 U.S. at 870. A component of the First Amendment is the right to speak with anonymity.  
 18 This component of free speech is well established. See, e.g., Buckley v. American  
 19 Constitutional Law Found., 525 U.S. 182, 200 (1999)(invalidating, on First Amendment  
 20 grounds, a Colorado statute that required initiative petition circulators to wear identification  
 21 badges); McIntyre v. Ohio Elections Comm'n, 514 U.S. 334, 357 (1995)(overturning an  
 22 Ohio law that prohibited the distribution of campaign literature that did not contain the name  
 23 and address of the person issuing the literature, holding that "[u]nder our Constitution,  
 24 anonymous pamphleteering is not a pernicious, fraudulent practice, but an honorable  
 25 tradition of advocacy and dissent. Anonymity is a shield from the tyranny of the majority.");  
 26 Talley v. California, 362 U.S. 60, 65 (1960)(invalidating a California statute prohibiting the

1 distribution of “any handbill in any place under any circumstances” that did not contain the  
 2 name and address of the person who prepared it, holding that identification and fear of  
 3 reprisal might deter “perfectly peaceful discussions of public matters of importance.”)

4       The right to speak anonymously was of fundamental importance to the establishment  
 5 of our Constitution. Throughout the revolutionary and early federal period in American  
 6 history, anonymous speech and the use of pseudonyms were powerful tools of political  
 7 debate. The Federalist Papers (authored by Madison, Hamilton, and Jay) were written  
 8 anonymously under the name “Publius.” The anti-federalists responded with anonymous  
 9 articles of their own, authored by “Cato” and “Brutus,” among others. See generally  
 10 McIntyre, 514 U.S. at 341-42. Anonymous speech is a great tradition that is woven into the  
 11 fabric of this nation’s history.

12       The right to speak anonymously extends to speech via the Internet. Internet  
 13 anonymity facilitates the rich, diverse, and far ranging exchange of ideas. The “ability to  
 14 speak one’s mind” on the Internet “without the burden of the other party knowing all the  
 15 facts about one’s identity can foster open communication and robust debate.” Columbia Ins.  
 16 Co. v. Seescandy.com, 185 F.R.D. 573, 578 (N.D. Cal. 1999). People who have committed  
 17 no wrongdoing should be free to participate in online forums without fear that their identity  
 18 will be exposed under the authority of the court. Id.

19       When speech touches on matters of public political life, such as debate over the  
 20 qualifications of candidates, discussion of governmental or political affairs, discussion of  
 21 political campaigns, and advocacy of controversial points of view, such speech has been  
 22 described as the “core” or “essence” of the First Amendment. See McIntyre, 514 U.S. at  
 23 346-47. Governmental restrictions on such speech are entitled to “exacting scrutiny,” and are  
 24 upheld only where they are “narrowly tailored to serve an overriding state interest.” Id. at  
 25 347. However, even non-core speech is entitled to First Amendment protection. “First  
 26 Amendment protections are not confined to ‘the exposition of ideas[.]’” Id. at 346, citing

1       Winters v. New York, 333 U.S. 507, 510 (1948). Unlike the speech at issue in Buckley,  
 2       McIntyre and Talley, the speech here is not entitled to “exacting scrutiny,” but to normal  
 3       strict scrutiny analysis.

4           In support of its subpoena request, TMRT argues that the right to speak anonymously  
 5       does not create any corresponding right to remain anonymous after speech. In support of this  
 6       contention, TMRT cites only to Buckley. TMRT argues that in Buckley, while the Court  
 7       struck down a requirement that petition circulators wear identification badges when soliciting  
 8       signatures, the Court upheld a provision of the same statute that required circulators to  
 9       execute an identifying affidavit when they submitted the collected signatures to the state for  
 10      counting. However, the Court’s reasoning in Buckley does not support the contention that  
 11      there is no First Amendment right to remain anonymous. It merely establishes that in the  
 12      context of the submission of initiative petitions to the State, the State’s enforcement interest  
 13      outweighs the circulator’s First Amendment protections. Buckley, 525 U.S. at 200, quoting  
 14      McIntyre, 514 U.S. at 523 (Ginsberg, J., concurring) (“We recognize that a State’s  
 15      enforcement interest might justify a more limited identification requirement.”) The right to  
 16      speak anonymously is therefore not absolute. However, this right would be of little practical  
 17      value if, as TMRT urges, there was no concomitant right to remain anonymous after the  
 18      speech is concluded.

19           B.       Applicable legal standard.

20           The free exchange of ideas on the Internet is driven in large part by the ability of  
 21      Internet users to communicate anonymously. If Internet users could be stripped of that  
 22      anonymity by a civil subpoena enforced under the liberal rules of civil discovery, this would  
 23      have a significant chilling effect on Internet communications and thus on basic First  
 24      Amendment rights. Therefore, discovery requests seeking to identify anonymous Internet  
 25      users must be subjected to careful scrutiny by the courts.

26

1       As InfoSpace has urged, “[u]nmeritorious attempts to unmask the identities of online  
 2 speakers . . . have a chilling effect on” Internet speech. The “potential chilling effect  
 3 imposed by the unmasking of anonymous speakers would diminish if litigants first were  
 4 required to make a showing in court of their need for the identifying information.”  
 5 “[R]equiring litigants to make such a showing would allow [the Internet] to thrive as a forum  
 6 for speakers to express their views on topics of public concern.” See InfoSpace’s  
 7 memorandum, docket no. 14 at 2. InfoSpace and NoGuano have accordingly urged this  
 8 Court to “adopt a balancing test requiring litigants to demonstrate . . . that their need for  
 9 identity information outweighs anonymous online speakers’ First Amendment rights[.]” Id.

10       In the context of a civil subpoena issued pursuant to Fed.R.Civ.P. 45, this Court must  
 11 determine when and under what circumstances a civil litigant will be permitted to obtain the  
 12 identity of persons who have exercised their First Amendment right to speak anonymously.  
 13 There is little in the way of persuasive authority to assist this Court. However, courts that  
 14 have addressed related issues have used balancing tests to decide when to protect an  
 15 individual’s First Amendment rights.

16       In Columbia Ins. Co. v. Seescandy.com, the plaintiff was unable to identify the  
 17 defendants when filing the complaint. That complaint named J. Doe defendants, and alleged,  
 18 *inter alia*, the infringement of a registered trademark when those defendants registered the  
 19 “Seescandy.com” domain name. See Seescandy.com, 185 F.R.D. at 576. The J. Doe  
 20 defendants had engaged in the allegedly tortious conduct entirely online, and anonymously.  
 21 Id. at 578. The court considered whether to allow discovery to uncover the identity of the  
 22 defendants so that they might be properly served and subject to the jurisdiction of the court.  
 23 The court recognized the defendant’s “legitimate and valuable right to participate in online  
 24 forums anonymously or pseudonymously.” Id.

25       Accordingly, the court ruled that four limiting principals would apply to such  
 26 discovery. The court required that the plaintiff identify the individual with some specificity

1 so the court could determine if they were truly an entity amenable to suit, and that the  
 2 plaintiff identify all previous steps taken to locate the defendant, justifying the failure to  
 3 properly serve. Id. at 578-579. The Seescandy.com court imposed two other requirements  
 4 that have direct relevance here. First, the plaintiff was required to show that the case would  
 5 withstand a motion to dismiss, “to prevent abuse of this extraordinary application of the  
 6 discovery process and to insure that plaintiff has standing[.]” Id. at 579-80. Second, the  
 7 plaintiff was required to file a discovery request justifying the need for the information  
 8 requested. Id. at 580. Therefore, the court required the plaintiff to demonstrate that the suit,  
 9 and the resulting discovery sought, was not frivolous, and to demonstrate the need for the  
 10 identifying information.

11 Similarly, in In re Subpoena Duces Tecum to America Online, Inc., 2000 WL  
 12 1210372, (Va.Cir.Ct. 2000), the court reviewed a subpoena seeking the identity of certain J.  
 13 Doe defendants who had allegedly made defamatory statements and disclosed confidential  
 14 information online. See America Online, Inc., 2000 WL 1210372, \*1. The Virginia court  
 15 recognized the First Amendment right to Internet anonymity, and held that an Internet service  
 16 provider could assert that right on behalf of its users. See id., \*5-6. The court applied a two  
 17 part test determining whether the subpoena would be enforced. First, the court must be  
 18 convinced by the pleadings and evidence submitted that “the party requesting the subpoena  
 19 has a legitimate, good faith basis to contend that it may be the victim of conduct actionable in  
 20 the jurisdiction where the suit was filed[.]” Id., \*8. Second, “the subpoenaed identity  
 21 information [must be] centrally needed to advance that claim.” Id. (emphasis added). In that  
 22 particular case, because the court concluded that the plaintiff had met these requirements, the  
 23 discovery was allowed. The Virginia court concluded that the compelling state interest in  
 24 protecting companies outweighed the limited intrusion on the First Amendment rights of any  
 25 innocent Internet users. Id.

26

1       The courts in Seescandy.com and America Online, Inc. applied similar factors. Both  
 2 required a showing of, at least, a good faith basis for bringing the lawsuit, and both required  
 3 some showing of the compelling need for the discovery sought. In both cases, the need for  
 4 the information was especially great because the information sought concerned J. Doe  
 5 *defendants*. Without the identifying information, the litigation against those defendants  
 6 could not have continued.

7       The standard for disclosing the identity of a non-party *witness* must be higher than that  
 8 articulated in Seescandy.com and America Online, Inc. When the anonymous Internet user is  
 9 not a party to the case, the litigation can go forward without the disclosure of their identity.  
 10 Therefore, non-party disclosure is only appropriate in the exceptional case where the  
 11 compelling need for the discovery sought outweighs the First Amendment rights of the  
 12 anonymous speaker.

13       Accordingly, this Court adopts the following standard for evaluating a civil  
 14 subpoena that seeks the identity of an anonymous Internet user who is not a party to the  
 15 underlying litigation. The Court will consider four factors in determining whether the  
 16 subpoena should issue. These are whether: (1) the subpoena seeking the information was  
 17 issued in good faith and not for any improper purpose, (2) the information sought relates to a  
 18 core claim or defense, (3) the identifying information is directly and materially relevant to  
 19 that claim or defense, and (4) information sufficient to establish or to disprove that claim or  
 20 defense is unavailable from any other source.<sup>5</sup>

21       This test provides a flexible framework for balancing the First Amendment rights of  
 22 anonymous speakers with the right of civil litigants to protect their interests through the

---

24       <sup>5</sup> This Court is aware that many civil subpoenas seeking the identifying information of  
 25 Internet users may be complied with, and the identifying information disclosed, without notice  
 26 to the Internet users themselves. This is because some Internet service providers do not notify  
 their users when such a civil subpoena is received. The standard set forth in this Order may  
 guide Internet service providers in determining whether to challenge a specific subpoena on  
 behalf of their users. However, this will provide little solace to Internet users whose Internet  
 service company does not provide them notice when a subpoena is received.

1 litigation discovery process. The Court shall give weight to each of these factors as the court  
 2 determines is appropriate under the circumstances of each case. This Court is mindful that it  
 3 is imposing a high burden. "But the First Amendment requires us to be vigilant in making  
 4 [these] judgments, to guard against undue hindrances to political conversations and the  
 5 exchange of ideas." Buckley, 525 U.S. at 192.

6       C.     Analysis of the present motion.

7       In the present case, TMRT seeks information it says will validate its defense that  
 8 "changes in [TMRT] stock prices were *not* caused by the Defendants but by the illegal  
 9 actions of individuals who manipulated the [TMRT] stock price using the Silicon Investor  
 10 message boards." This Court must evaluate TMRT's stated need for the information in light  
 11 of the four factors outlined above.

12       1.     Was the subpoena brought in good faith?

13       This Court does not conclude that this subpoena was brought in bad faith or for an  
 14 improper purpose. TMRT and its officers and directors are defending against a shareholder  
 15 derivative class action lawsuit. They have asserted numerous affirmative defenses, one of  
 16 which alleges that the defendants did not cause the drop in TMRT's stock value. TMRT  
 17 could reasonably believe that the posted messages are relevant to this defense.

18       However, as originally issued the subpoena seeking the identity information was  
 19 extremely broad. The subpoena would have required the disclosure of personal e-mails and  
 20 other personal information that has no relevance to the issues raised in the lawsuit. This  
 21 apparent disregard for the privacy and the First Amendment rights of the online users, while  
 22 not demonstrating bad faith *per se*, weighs against TMRT in balancing the interests here.

23       2.     Does the information sought relate to a core claim or defense?

24       Only when the identifying information is needed to advance core claims or defenses  
 25 can it be sufficiently material to compromise First Amendment rights. See Silkwood v. Kerr-  
McGee Corp., 563 F.2d 433, 438 (10th Cir. 1977)(in order to overcome the journalistic

1 privilege of maintaining confidential sources, a party seeking to identify those sources must  
 2 demonstrate, *inter alia*, that the “information goes to the heart of the matter[.]”) If the  
 3 information relates only to a secondary claim or to one of numerous affirmative defenses,  
 4 then the primary substance of the case can go forward without disturbing the First  
 5 Amendment rights of the anonymous Internet users.

6       The information sought by TMRT does not relate to a core defense. Here, the  
 7 information relates to only one of twenty-seven affirmative defenses raised by the defendant,  
 8 the defense that “no act or omission of any of the Defendants was the cause in fact or the  
 9 proximate cause of any injury or damage to the plaintiffs.” This is a generalized assertion of  
 10 the lack of causation. Defendants have asserted numerous other affirmative defenses that go  
 11 more “to the heart of the matter,” such as the lack of material misstatements by the  
 12 defendants, actual disclosure of material facts by the defendants, and the business judgment  
 13 defense.<sup>6</sup> Therefore, this factor also weighs in favor of quashing the subpoena.

14           3.     Is the identifying information directly and materially relevant to a core  
 15                      claim or defense?

16       Even when the claim or defense for which the information is sought is deemed core to  
 17 the case, the identity of the Internet users must also be materially relevant to that claim or  
 18 defense. Under the Federal Rules of Civil Procedure discovery is normally very broad,  
 19 requiring disclosure of any relevant information that “appears reasonably calculated to lead  
 20 to the discovery of admissible evidence.” Fed.R.Civ.P. 26(b)(1). But when First  
 21 Amendment rights are at stake, a higher threshold of relevancy must be imposed. Only when  
 22 the information sought is directly and materially relevant to a core claim or defense can the  
 23 need for the information outweigh the First Amendment right to speak anonymously. See  
 24 Los Angeles Memorial Coliseum Comm'n, 89 F.R.D. at 494 (holding that a party seeking to  
 25

---

26           <sup>6</sup> Many of TMRT’s affirmative defenses might be viewed by this Court as “non-core,”  
 including comparative fault, estoppel, laches, and unclean hands.

1 enforce a subpoena to disclose non-party journalistic sources must demonstrate that the  
2 information is of “certain relevance.”)

3 TMRT has failed to demonstrate that the identity of the Internet users is directly and  
4 materially relevant to a core defense. These Internet users are not parties to the case and  
5 have not been named as defendants as to any claim, cross-claim or third-party claim.  
6 Therefore, unlike in Seescandy.com and America Online, Inc., their identity is not needed to  
7 allow the litigation to proceed.

8 According to the pleadings, the Internet user known as NoGuano has never posted  
9 messages on Silicon Investor’s TMRT message board. At oral argument, TMRT’s counsel  
10 conceded this point but stated that NoGuano’s information was sought because he had  
11 “communicated” via the Internet with Silicon Investor posters such as Truthseeker. Given  
12 that NoGuano admittedly posted no public statements on the TMRT site, there is no basis to  
13 conclude that the identity of NoGuano and others similarly situated is directly and materially  
14 relevant to TMRT’s defense.

15 As to the Internet users such as Truthseeker and Cuemaster who posted messages on  
16 the TMRT bulletin board, TMRT has failed to demonstrate that their identities are directly  
17 and materially relevant to a core defense. TMRT argues that the Internet postings caused a  
18 drop in TMRT’s stock price. However, what was said in these postings is a matter of public  
19 record, and the identity of the anonymous posters had no effect on investors. If these  
20 messages did influence the stock price, they did so without *anyone* knowing the identity of  
21 the speakers.

22 TMRT speculates that the users of the InfoSpace website may have been engaged in  
23 stock manipulation in violation of federal securities law. TMRT indicates that it intends to  
24 compare the names of the InfoSpace users with the names of individuals who traded TMRT  
25 stock during the same period to determine whether any illegal stock manipulation occurred.  
26 However, TMRT’s innuendos of stock manipulation do not suffice to overcome the First

1 Amendment rights of the Internet users. Those rights cannot be nullified by an unsupported  
2 allegation of wrongdoing raised by the party seeking the information.

3           4. Is information sufficient to establish TMRT's defense available from  
4           any other source?

5           TMRT has failed to demonstrate that the information it needs to establish its defense  
6 is unavailable from any other source. The chat room messages are archived and are available  
7 to anyone to read and print. TMRT obtained copies of some of these messages and  
8 submitted them to this Court. TMRT can therefore demonstrate what was said, when it was  
9 said, and can compare the timing of those statements with information on fluctuations in the  
10 TMRT stock price. The messages are available for use at trial, and TMRT can factually  
11 support its defense without encroaching on the First Amendment rights of the Internet users.

12 **CONCLUSION**

13           The Internet is a truly democratic forum for communication. It allows for the free  
14 exchange of ideas at an unprecedented speed and scale. For this reason, the constitutional  
15 rights of Internet users, including the First Amendment right to speak anonymously, must be  
16 carefully safeguarded.

17           Courts should impose a high threshold on subpoena requests that encroach on this  
18 right. In order to enforce a civil subpoena seeking the identifying information of a non-party  
19 individual who has communicated anonymously over the Internet, the party seeking the  
20 information must demonstrate, by a clear showing on the record, that four requirements are  
21 met: (1) the subpoena seeking the information was issued in good faith and not for any  
22 improper purpose, (2) the information sought relates to a core claim or defense, (3) the  
23 identifying information is directly and materially relevant to that claim or defense, and (4)  
24 information sufficient to establish or to disprove that claim or defense is unavailable from  
25 any other source.

26

The Court has weighed these factors in light of the present facts. TMRT has failed to demonstrate that the identify of these Internet users is directly and materially relevant to a core defense in the underlying securities litigation. Accordingly, Doe's motion to quash the subpoena is GRANTED.

IT IS SO ORDERED.

DATED this 26<sup>th</sup> day of April, 2001.

THOMAS S. ZILLY  
UNITED STATES DISTRICT JUDGE
